

Date	04 July 2026
Team ID	xxxxxx
Project Name	HDI Predictor Using Machine Learning
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Input Data	Stage 2: Prediction	Stage 3: Result Use
Actions	Opens Flask app, enters HDI-related values, and submits form.	Reviews inputs, clicks predict, and waits for ML output.	Reads predicted HDI score/category and uses it for analysis.
Touchpoints	Input page, form fields, validation messages.	Predict button, Flask backend, trained ML model.	Result page, HDI output, interpretation note.
Thoughts	Which values are required? Is my input correct?	Is the prediction reliable? How long will it take?	What does this HDI mean? Can I trust the output?
Feelings	Curious but slightly unsure; needs clear guidance.	Hopeful while waiting; concerned if response is slow.	Satisfied if result is clear; needs confidence in accuracy.
Process Ownership	User with Flask application interface.	Flask application and ML model.	User with support from result explanation.
Opportunities	Add sample values, hints, and instant validation.	Show loading status, improve response time, mention accuracy.	Explain score, give comparison range, allow download/share.
