

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	HDI Predictor Using Machine Learning
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the need for HDI prediction, and discuss the problem being addressed.	2	Shaik Mahammad Mathin
2	Solution Overview	Explain the project architecture, dataset, Linear Regression model, Flask framework, and overall workflow.	3	Guna Sekhar Reddy Gade
3	Live Application Demonstration	Demonstrate the web application by entering HDI indicator values and showing the predicted HDI score and category.	5	Venkata Karthikeya Baratam
4	Model & Technical Implementation	Explain data preprocessing, model training, evaluation, model serialization (HDI.pkl), and Flask integration.	3	Tumati Saranya
5	Results, Testing & Future Scope	Present prediction results, testing outcomes, project limitations, and future enhancements.	2	Navadeep Ram Duggirala
6	Questions & Discussion	Answer questions from the mentor/evaluators and conclude the demonstration.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the motivation, objectives, and expected outcome of the HDI Predictor project.
2	Solution Overview	Present the architecture, dataset, Linear Regression model, and technology stack.
3	Live Feature Demonstration	Demonstrate data input, HDI prediction, and category classification using the Flask web application.
4	Q&A Session	Address evaluator questions, discuss challenges faced, and explain future enhancements.
